Prof. Khwaja Sadiq Husain FRCP(Ed); FCPS(Pak) FCPS(BD) MAM(Malaysia) (November 04th, 1926 — June 09th, 2024)

It was in November 2014 that Khwaja Sahib rang me up and requested that after his death I should write his obituary. I am pleased to fulfill that promise which I made hence this obituary note. — SAJ

BIJLI to the saintly figure late Prof. Kh. Sadiq Husain had gone through different phases in his ninety-eight years' life and he did a commendable job of describing all these phases in his autobiography "Reflections" honestly. He had a full life and played his innings well, earned tremendous respect in the medical profession and the society at large and earned honorable retirement in 1986. What is much important is that he tried to leave message at the end of every chapter of his autobiography. He was born on November 4th 1926. Son of

From Prince nicknamed as leisure which were routine. It was Col. Ziaullah who in King Edward Medical College used to call him "Prince." As one of the two House Officers in the Ward, he used to administer intravenous injections, aspiration, lumber puncture. After graduation, he went to UK on a ship for postgraduate training and

a police officer in pre-partition days, he had the privilege of early schooling at English Boarding School in Dehradun. It was an elite school and he lived in Col. Brown's Cambridge School which was meant for sons and relatives of Maharajas, Nawabs and Rajas, land owners and businessmen. His father used to call him Dr. Sadiq at young age as he was sure that he is going to become doctor. In this school the students used to be taught in English and Thinking in English. He practically learnt values like character building, ethics, fair play, integrity and honesty which were the basic objectives of education in those days. He had interest in sports i.e. Hockey, Football, Tennis and Cycling, Squash but in his later life he also started playing Golf. One of the lessons he always taught was "Don't presume but

rich dividends. He joined Govt. College Lahore in 1943 and got admission in King Edward Medical College in 1944. It was his good luck that in those days' teachers were more interested in teaching than the students. Attracted by the charismatic personality of Quaide-Azam he joined Muslim Students Federation affiliated to Pakistan Muslim League. Hence this provided him ample opportunities Quaid never talked to the students about politics but about their duties, responsibilities to the those days during training there profession, character building,

determination and service to the methods, the art of history development of the upcoming taking and a meticulous physical State of Pakistan, honesty, integrity and patriotism. His father a senior police officer in Indian Police was offered to continue as Inspector General of Police in India but he opted to come to Pakistan. The family boarded the last train from India coming to Pakistan for a two days' journey with an overnight stay in Delhi. The Hindu driver refused to take the train further for fear of his life. Luckily a similar train of Hindu refugees arrived from Ferozepur, the driver was Muslim who also refused to go further. The Railway staff just switched the drivers and the trains moved on. The horror of the family ended when it reached Lahore in Pakistan.

In college days Prof. Kh. Sadiq Husain learnt the importance of punctuality, regularity organized distribution of time frame between work, rest, recreation, prayer and

Personal communications from late Prof. Kh. Sadiq Husain

I am one of those a few lucky ones in the country whom late Prof. Kh. Sadiq Husain loved, admired nd respected a lot which is evident from the personal communication which he addressed to me on pril 1st 2024. He passed it on to his son Haroon who shared it with me through WhatsApp. After eading it, tears came to my eyes and I just could not control it for some time. I thought this personal mmunication was not less than an Award which I will cherish for the rest of my life. How lucky am that such an eminent distinguished physician of the country had expressed his feelings for me which are reproduced below:

Ay dear Shaukat,

Fortnightly PULSE International

The date (April 1st when I am writing this letter) is a mere o-incidence. No one is fooling yone in this World except oneself cause the final result has yet to

I am just writing a short note be-

use I have been seriously ill and I

lought that the present time is appropriate to wish you and your family all the best and blessings for Ramada nd Eid. It will probably be my last note to someone I really respect and admire. You have done so much for the ofession and especially in the field of scientific writing that it would take a book to recount. Now you have ken up another project "History of Medicine in Pakistan"- I am sure another Epic, wish you all the success.

I want to thank you for all your help, cooperation, encouragement over the years- only Allah can pay that ck - now and in the hereafter. Amin. I have progressive cardiovascular disease. Best of luck. Yours sincerely.

I rang up Haroon Sahib and informed him that I will be visiting Lahore next month and would like to visit n. Sahib to pay my respects. When I went to Lahore I again rang up Haroon Sahib and asked him to arrange

ne meeting and also share the location of the house which he did. I went to see Khwaja Sahib on April 18th 2024 nd spent an hour with him. I expressed some of his feelings in a column which I later wrote in "Off the Record which was published in May 1st, 2024 issue of Pulse International.

Khwaja Saadig Husain

The first personal letter which I received from Khwaja Sahib was in 1989 and he had some apprehensions about e. Keeping up the professional ethics, I published that letter (Verbatim without any editing) in the newspaper hich perhaps he did not expect. But soon he came to know the real Shaukat Ali Jawaid and that was the turning point in our relationship. Though he used to ring me often and discuss certain issues and seek my opinion but metime he will also write a personal letter.

It was in November 2014 that he rang me up and said "Shaukat can I make a request". I was a bit surprised nd said, Khwaja Sahib, You can order why make request. If possible I will do what you say. He then said "it is ny wish that you should write my obituary". At this I told Khwaja Sahib that who knows who has to go first or You. Secondly if alive I will write but I only know about your professional career as I have been observing ou since 1968 or 69 but know nothing about your personal life. He said there is nothing sensational about my ersonal life. Later in a meeting which was followed by another personal communication, he shared some details his personal life as well.

* * * * * * * *

The next communication which I received was after he received copies Pulse International dated November $5^{
m th}$, 2019 wherein I had analyzed and reviewed his autobiography "Reflections". He forgot to mention the date n which he wrote this letter. It reads:

"I was overwhelmed after when I received twenty copies of Pulse International recently. I would have respondearlier but I had a bad fall and was confined to bed (still am). I don't have the words to express my gratitude r your immense labour in virtually condensing the book (Reflections) in three pages of Pulse Internaitonal. As matter of concern I wonder if anyone should bother to read the book after your review. But jokes aside apart om what was written **you have even "filled in the blanks" whichever I had forgotten** (the Quetta CPSP elecons and the aftermath). Thank you again. After reading your review I have a sigh of relief at the thought that refforts were worth the trouble and that some (however few) MAY benefit from the contents that in essence as the purpose of the book as I had no financial interest in it. I pray to Allah that HE accepts it as an attempt improve ourselves as professionals but more importantly as Muslims and even more as human beings and

To have "usurped" three full pages of your esteemed publication (Pulse International) was more than I could ve dreamed about. Only Allah can repay that debt to you. I received the beautiful letter with similar comments m Gen. Mahmud Ahmed Akhtar (Rawalpindi) and pray it is accepted by the general reader who cares.

With renewed thanks for your time, labour and Space and prayer for you and your family. Yours most sincerely

* * * * * * * *

The next letter he wrote me was on December 18th, 2020 after he received my latest book on "Medical Historyritten in Haste". It read

"My dear Shaukat As Salamm O Alaikum

I hope this finds you and the family in the best of health. I have received your gift of another memorable book yours on **"Medical History"** and I am honoured to be included in your **selected elite**. It is a tremendous job lone with a Herculean effort to have assembled so much information from so many - some of who are not even education, medical practice, administration, public health, discipline etc., often against all odds. It is making ascinating reading, I haven't finished it but it is full of inspiration. Congratulations for your effort. I am most grateful for your generous remarks and equally thankful for filling in some details in CPSP chapter which I honestly say I did not know. I was so disgusted at that time with the whole sordid affair that I did not even bother to find out later what had transpired behind the "iron curtain". I was even shocked to read a write up by General Mahmud Ahmed Akhtar Sahib in Pulse Internaitonal about the whole affair. (CPSP elections 1996). However, that is now history not worth recalling. Had I known it I would have reproduced that whole article in the book.

You must be wondering why I have sent you another copy of "Reflections". There are two reasons. The first one is the answer to your accurate observations about the repetition of a para in the book, we noted it too, and some punctuation and typographical errors. I hope no more remain, so we corrected those. Secondly I have added another small chapter titled "Real Success" of two three pages only. I felt it is relevant and the book is somehow incomplete without it in this day and age. Today there are many misconceptions and consequently misendeavours about success in all professions and the medical profession is no exception. I thought you must have the complete and revised version. You will be pleased to learn that the Urdu version is almost complete. Since the book has a limited circulation, I wonder if you would consider giving space to that article the Real Success in

Pulse Internaitonal – obviously if you approve and find it fit for publication. With best regards - and remember you and your family are always in my prayers.

Yours sincerely,

* * * * * * * *

Khwaja Sahib was a regular reader of my column "Off the Record" published in Pulse International which is eflected in his letter which he addressed me on **February 17th2022.** It says "My dear Shaukat A.O.A

I have been planning for weeks to write this letter but my wife's sudden serious illness of cerebral hemorrhage totally disrupted everything. However, with Allah's blessings and prayers of relatives and friends He has granted miraculous recovery and now she is more than 90-95% better.

Thank you for your latest installments of Pulse. You know whatever I may or may not read in Pulse before till now I ALWAYS make it a point to read scrupulously "Off the Record". It would be so advisable that the federal and provincial health ministers should receive not necessarily the entire issue of the Pulse International but at least "Off the Record" which details "the immediate issues, problems, complaints, implications, consequences and suggestions and implementations of their responses."

"At least it will give the politicians some idea of health problems and their possible solutions of which they have no clue. I am confident that any official worth his salt will at least know what he is up against and there are eople prepared to help him(her) solve HIS problems and in the process help the common man.

I apologize for the untidy writing but you know age is catching up and may be this is my last communication you in ink and paper

With best wishes for you and your family's health and happiness. Yours sincerely, Sadiq
